Introduction

What are these settings Extras apps?

Settings Extras are a collection **LUMIA Exclusive feature apps** which are usually found in the end of the settings page.

|THOSE ARE;

- Extras & Info
- Glance screen
- device hub
- Display
- Audio
- Touch
- Motion Data
- Call+SMS filter
- Hey Cortana
- network+
- Nokia Acccount
- Rate us

What is the need to Uninstall them?

These apps are updated via the store back in the day and is a must thing to do cause they carry more features & fixes.

But now that the store is down, you won't be able to update them and will be forced to stuck with the versions you have.

But, in this guide, **we will show you how to Uninstall almost all of these and also will give you the latest installation package for each of them so that you can install the latest once you uninstall it.**

Any pre-requirements?

NO, nothing is required in order to uninstall these apps, but you will need **Jailbreak** If you need to install latest version.

Preparations

> Latest Settings Extras apps installation packages.

Download if you want to install the latest version after uninstalling.

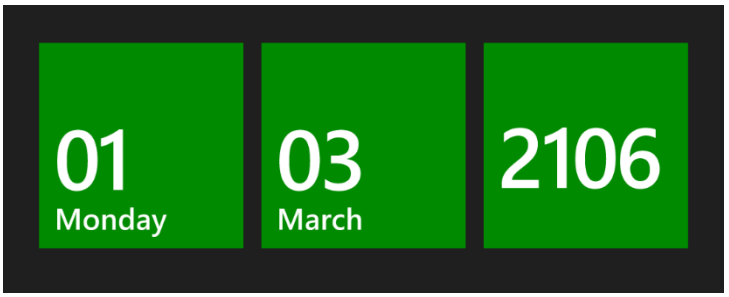
How to Uninstall Settings Extras apps

> In your phone, go to;

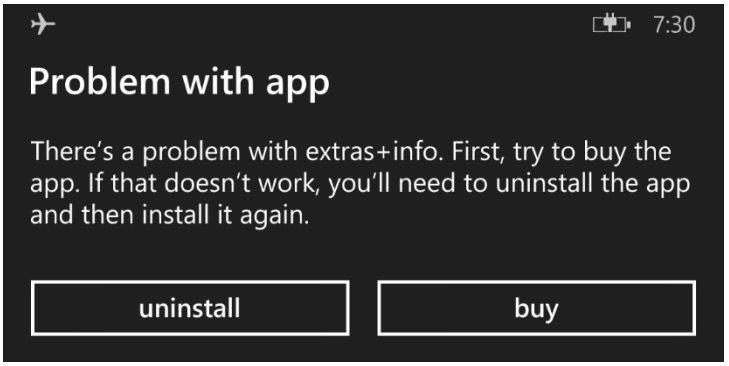
"Settings → date + time"

> Change the Month and Year to **March, 2106** or to any date above that.



> Now go back and try to open any of the Settings Extras apps.

Instead of opening, you will be presented with this error prompt.



> Select "Uninstall" and it will be deleted right away.

> Do the same for all the Settings Extras apps!

You will be able to delete all of them **except "network+"** settings app**.**

Although *network+* latest version didn't bring any new significant changes, if you still want to update it, then you will need to *use the ordinary System app Uninstallation Guide from us.*

Look in the next page of the guide to get that guide!

TIP

Make sure to revert the Date, Month & Year back to the correct ones after uninstalling all the apps you need.

Otherwise, you won't be able to use your phone.

Alternate method to Uninstall Settings Extras apps

Apart from the Date change method we used here, you can uninstall Settings Extras apps without that too using another method.

And that is with *WPV XAP Deployer which means it needs a PC*.

Download WPV XAP Deployer.

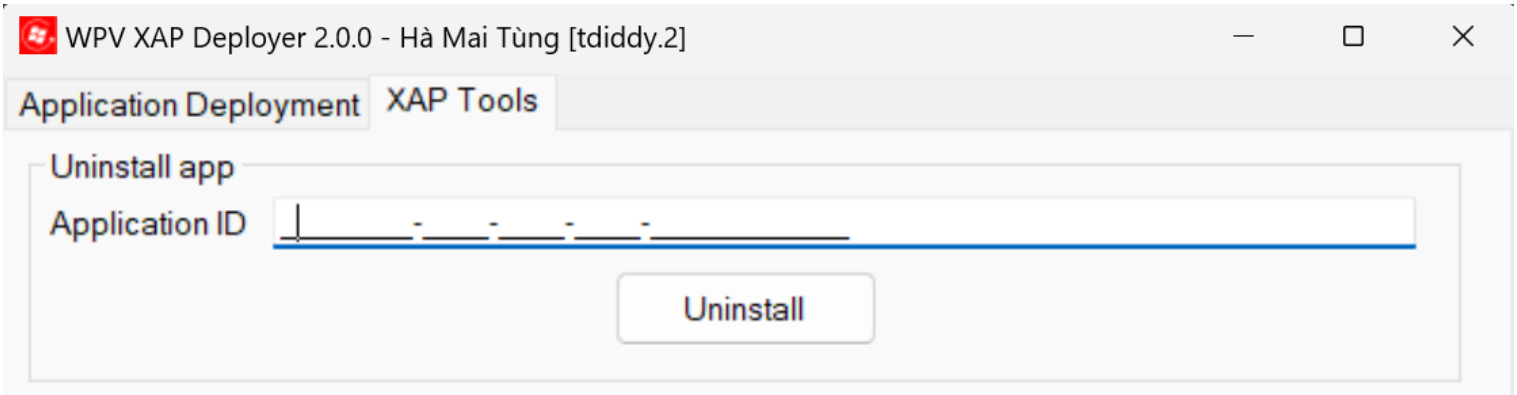
W.U.T MEGA

How to;

> Connect your Windows Phone to PC via USB Connection.

> Open WPV Xap Deployer

> Go to **XAP Tools** tab.



All you have to do is *copy & paste the below Application IDs of the Settings Extras app you want to uninstall from below table* and click *Uninstall* in WPV XAP Deployer.

End Notes

- You can't uninstall network+ settings app.

  If you really want to uninstall it, you will need to use the main System app uninstallation guide which is linked in above page.

- These settings extras apps are exclusive to NOKIA Lumia devices.

  But every model will not have all of them as these feature apps are device model dependent.

That's all for this guide!

THANK YOU!!
